# In The Beginning

Lyrics from the "The Creation Suite" by Norma

## Beginning

It is I who see all  
From a viewpoint high above  
A swirling cloud of energy  
With thoughts of truth and love.

I have legions I employ  
To get many tasks done  
I am the energy for your universe  
I am your Sun, I am your Son.

## Birth

Gases swirled and exploded  
Raining fire and ashes down onto Earth  
below  
As we watched hushed and silent  
He is our Sun.

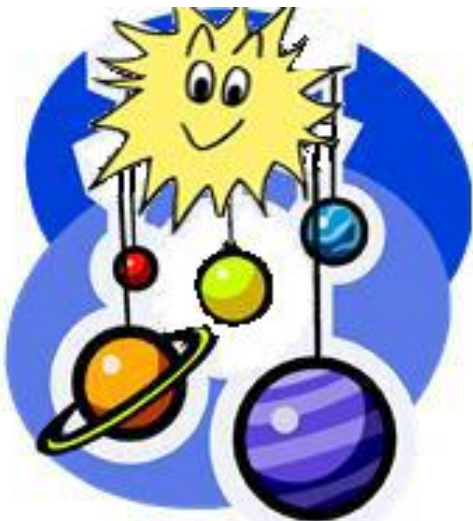

The power and the glory of God  
Will be forever  
He is our Sun,  
He is our Son.

## Development

The planets moved away from their  
birthplace  
And as the first one was lifted and on  
its own  
It was beautiful to see  
Like a babe taking its first step  
This first-born Sun, this first-born  
Son.

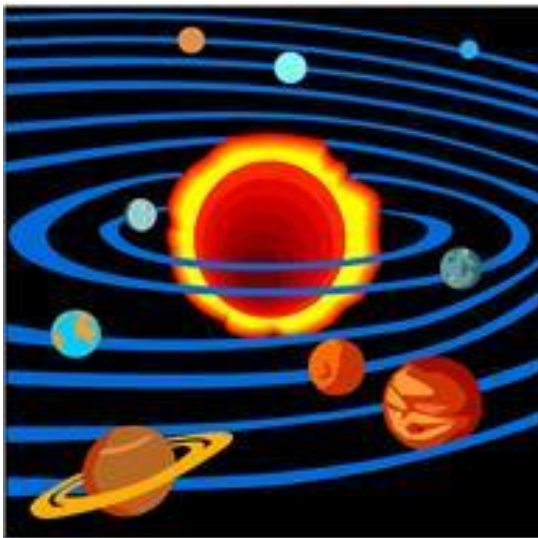

As each moved off into the cosmos  
The silence was broken by a musical  
tone  
The Spirit Mind was still connected to  
each one, through a tiny line  
This is the way He sends His thoughts  
down, to all His children  
They were each a Sun, they were a  
Son.

## Growth

The Creator's thoughts formed  
Into sunsets and dawns  
They were His Suns  
They were all His Sons.

They gathered two by two in silence  
Then joined in purity  
And joined in harmony  
A chorus strong and beautiful to see.

## Frustration

Suddenly came discontent  
Then came the storms  
Winds started howling  
Rain came pouring down

The lightning flashed  
The storms grew angrier  
With the power and glory of our Sun

The thunder rolled, the lightning  
flashed and reached out  
As each grew larger, stronger, hotter  
Reaching further, growing meaner,  
tensions building, tempers growing  
Then the lightning bolts exploded,  
sizzled, sparks drifted down.

## Solution

As the fire came raining down  
Everything was covered  
First the ground was washed all over  
With a light and glistening rain  
Over which God hovered

Next came the coating  
On all the trees and beautiful flowers  
Giving them luster of their own  
So they could reflect the perfect light  
Of their only Sun.

Then came the fire and glory  
That shattered into sparks that  
glowed  
And found their home in us.

## Thankfulness

We were really quite blessed  
To receive this love  
This love from our father.

What a most glorious sight  
We must perfect our souls  
So we can return to our Father.

## Our Creator

The power and the glory  
The fire and the beauty  
The pain and the love.

The wonder of Him who adored us  
From His home above  
You are His son, you are each His son.

## *Harmony in the Universe*

*By Norma*

*In the vastness of space  
And in the stillness of time  
There is a Harmony  
Causing the stars to shine.*

*Each star on its own  
Would look black in space  
But there is a Harmony  
That lights up each one's face.*

*The vastness of the universe  
Seems so huge and strange  
But there is a Harmony  
That round about does range.*

*There is no wind as such  
No sound of anything  
But there is a Harmony  
That makes it seem to sing.*

*All around we sense our God  
In all His many forms  
Be glad there is a Harmony  
That brings Him to our arms.*

*If all were truly still  
And all were truly dark  
Then we'd have no Harmony  
Naught would leave a mark.*

*When looking at the heavens  
And sending thoughts to God  
Be sure to feel this Harmony  
Tis' the way we all must trod.*

*Harmony is God, my friend  
In everything we do  
This Harmony is God, so  
Let the Harmony be you.*

# *Standing On The Edge Of Earth*

*By Norma*

*When standing on the edge of Earth  
And looking over the side  
We find a New Age being born  
O'er the universe so wide.*

*Not just on our own home star  
But way, way out in space  
All things of God's creation  
Must take a step up with grace.*

*Dear Earth is not as graceful  
As most of the other stars  
She still falls down in many ways  
And has her spats and wars.*

*This new time of wonder being born  
Is cause for all to rejoice  
Each star has its own different sound  
And all will be given voice.*

*Earth will join her sister stars  
In the universe at large  
She will have won the hard fight  
Of her destiny she'll take charge.*

*She is destined for beauty, you know  
Whose fault she hasn't achieved?  
Standing on the edge of time, my friend  
Do not feel so bereaved.*

*Ask what you are doing to help  
So she can step forward in time  
If all share in the work to do  
In glory and grace she'll shine.*

## *Harmony of the Spheres*

*By Norma*

*Harmony is the way my friend  
Let Mankind join the song  
If each would start out humming  
He'd blend in 'ere long.*

*Picture the flowers in nature  
As you take your long, long hike  
They blend in beauty always  
As no two are alike.*

*The blending of our thoughts  
At odds within us still  
Will help the feeling nature  
Our happiness fulfill.*

*None have the total answer  
We're like isolated notes  
If we could harmonize together  
We'd hear the music He wrote.*

*Harmony then would enter  
We'd feel much more at peace  
The blend of music and color  
Our daily lives would ease.*

*They're be Harmony of all kingdoms  
And Brotherhood of Man  
We'd soon see peace eternal  
Spread o'er the beautiful land.*

*Just feel the rhythm in you  
Let the melody fill your ears  
Be part of one big chorus  
The Harmony Of The Spheres.*

## ***Walk With The Angels***

*By Norma*

*Walk, walk, Walk ith The Angels*

*Walk, walk, walking along*

*Talk, talk, talk with the angels*

*While they're singing their song.*

*Why not Walk With The Angels*

*When they're moving along*

*They will always guide you*

*So you won't go wrong.*

*Why not Walk With The Angels*

*Step out sure and strong*

*They'll lead you to glory*

*Singing a heavenly song.*

*Why not Walk With The Angels*

*Walk hand in hand*

*They want you to join them*

*In their heavenly band.*

*Why not Walk With The Angels*

*On the mountain top*

*It is so exciting*

*You'll never want to stop*

*Why not Walk With The Angels*

*It's one sure way to go*

*You won't get in trouble*

*You'll be with friend not foe.*

*Why not Walk With The Angels*

*Match their heavenly tread*

*You will always follow*

*Where their feet have led.*

# Did You Ever Wonder

by Norma

*Did you ever wonder, did you ever question*

*How far the nearest star must be?*

*Did you ever wonder, did you ever question*

*Just how far your eyes can see?*

*Just how far your eyes can see*

*How great t'would seem to be so free.*

*It feels so strange to look out there*

*As though there's joy too sweet to bear.*

*Did you ever wonder, have you had a feeling*

*That there's something drawing you?*

*Did you ever wonder, have you had a feeling*

*That something old can seem so new?*

*Like love that's been there all the time*

*You feel it with you as a sign.*

*This love transcends all time and space*

*I long for the day when I'll see it's face.*
