*Humans relate to and are thrilled by fireworks*  
*as a distant memory of creation.*

These teachings will clearly show that  
Birth (Creation) and Development (Evolution)  
go hand in hand.  
You cannot have one without the other.

## A Profile

*Norma Hickox*

*Photo by Neil Hickox*

I am a professional musician. I play and teach six instruments and compose music. I've been an organist and choir director for many different religious denominations. I have also taught vocal music in private elementary and pre-schools and have had my own dance band in the past. I live with my husband Lyle in Grand Junction, Colorado. We have one son, Neil, a computer scientist living in California. Neil has done many of the drawings used in the teachings.

When I began composing in 1981, the music and lyrics would flow out in complete form. A year later, I began to receive information from a spiritual source that flowed the same way as the music. This new material was later explained to be from spiritual teachers whose intent is to bring the Chrysalis Teachings to human understanding. My individual part in the work is to act as a thought provoker; to bring through ideas that stretch our minds and break us out of the shells of old thinking; allowing us to wonder "What If." This work is in the realm of creative ideas, before inventions are made or new products are designed and opens the possibilities of new ways of doing things. For the last twenty years I've been working on the Science of Music. This science will tie everything that has existed since the time of the big bang until now, to a musical vibration for the purpose of finding compatibility between the different kingdoms.

I have been blessed with the privilege or gift of "knowing" many spiritual truths. It seems that some part of my makeup has the ability to "know" and "see" the aspects of creation in a way that relates to musical vibrations. Actually, being a musician, it was the vibrations of music that I've been exposed to since the age of four that enables me to do this.

These notebooks enable us to look at any time period of the universe. They allow us to experience events that have happened in the past, events that are happening now, and events that will happen in the future. Each New Millennium NoteBook will take a look at a small portion of the TimeLine of Eternity.

Chapter 1 - The Birth of the New Creation . . . . .	1
Chapter 2 - The Development of the New Creation . . . . .	15

Today

## CHAPTER ONE

# The Birth of the New Creation

### The New Creation

The New Creation is basically a grass roots movement of the people, rising up in consciousness to claim their birthright, their divine heritage. This divine heritage restores the rights of individuals. It necessitates each one taking responsibility for their own actions and also their reactions to situations. This will eliminate the self-pity and martyr syndromes that so many are locked into.

### Early Books Were Compiled Thousands Of Years After They Happened

The early writings in the Bible were compiled many thousands of years after they happened. It is a known fact that a story or tale gets changed in some way every time it is repeated. The first telling may have been accurate as far as facts, but the facts were never retold correctly. Early man had no conception of space travel just as man today has no conception of universal life. How could anyone describe events that they didn't understand and couldn't even reason out on an intelligent level? The best that can be said about the writers of the Old Testament is that they tried. They did preserve history for us, but it should not be taken literally.

The early books of the Bible were all set down

by one man. He attributed what he was writing to others, but in reality he wrote them all. No one knows him. His name was Joachim. He was under divine impression to do this task and made them fit the mentality of the uneducated man of that period. Also, he did find scrolls depicting the visits of spacemen to earth and interpreted them as best he could. He was not a psychic or a communicator. He was able to receive thought impression, but only in a limited way. The scrolls he found were in a basement of a castle in Rome and had been damaged by water some time earlier. These same scrolls are even today buried in the bottom of a box in the papal palace in Rome. They are rolled up and banded together with an outer covering of a map rolled around them to disguise them.

Joachim set down on paper the first four books of the Bible. No more was recorded for three hundred years. Joachim had done his writing in the year 2000 B.C. In 1700 B.C. the next two chapters were written by a man named James who wrote them as tales that had been told him. The rest of the Old Testament was recorded as it happened and therefore was more accurate, but still at a level for less evolved humanity.

Some of the passages in the Bible are a gener-

alization. These passages were written hundreds of years after the events happened and were being looked back on from an overview and then sent through a channel on the earth plane, who tried to make the stories understandable to the unevolved man at that particular time in history. He then had to write them down in a language which is no longer in existence. That language was translated and then translated again and then translated again. It is not accurate. It was a scientific report or analysis of the data of ongoing experiments that was sent through Joachim. This scientific report was then recorded in the "fairy tale" mode that has caused much misunderstanding of what actually took place.

These explanations of creation covered many long years of tedious writing for Joachim. He was one of the first scribes and used a difficult method of putting this on paper. He was in Greece and used an ink made from the berries of the juniper bushes. These bushes also were the ones in the story of Moses and the burning bush and in his demonstrations showing complete control over this force of nature. These berries, at that time, contained an ingredient that would be what we today would call indelible. Joachim actually wrote with the berry and as it dried the writing disappeared. He then had to wet the parchment and apply ground spices to it so that it dried the writing into being legible. The spacebrothers advised him how to do this and gave him free rein in interpreting this story as he saw fit, to bring it to a level that humanity could understand.

The Old Testament is made up of tales like those told around a campfire or an old coal stove when a group of men get to talking. Humans have and have always had a tendency to exaggerate their stories to make them interesting. This happened to many stories that were true pictures of the times only they were fan-

cialled up.

## **Period Between The Old Testament And The New**

In the years between the last book of the Old Testament and the first book of the New, there is a long time period left blank as far as history goes. The birth of Jesus had been prophesied and the space fathers pulled away and waited to see if humanity would pull themselves up the evolutionary ladder without proceeding with the plan that Jesus finally carried through. Obviously it didn't.

This was a time period when there were no visits by space ships. The earlier writings about the early visits of space people that had been recorded were changed during this time, towards the end of it, as the people rewriting the early books thought that whoever had written them was obviously out of his mind. As far as they were concerned, there were no such things as had been written. The feeling that was prevalent at the time of this rewriting was that they were all made up in order to make a better story. It was a group of men in a monastery in Rome that took it on themselves to change history. This group of men has been paying back karma for this ever since.

Material was deleted from the Bible for selfish purposes, although when it was first determined that the people would behave better if they didn't know about reincarnation, it was thought to be for their own good. In other words, it wasn't done maliciously, but misguidedly. The men who first perpetrated this act had no idea of the far-reaching consequences of their deed. Therefore, the fundamental backbone of all Jesus' teachings was twisted and deleted.

The first testament was given accurately to the receivers, who at that stage of evolution, sim-

ply were not advanced enough to understand what they were told. This was not taken into consideration by the space brothers and the teachings were brought down to the stage of fantasy to help these unevolved humans to understand. They're like fairy tales, but do have a basis of truth to all of them.

Can you imagine trying to explain some difficult philosophical concept to an African headhunter today? The only possible way to do this, or try to do it, would be to relate it to something of their world that they could understand. A combination of sign language and items in front of their eyes was used. They all knew a snake, an apple, a tree, a leaf, etc. Does this help you understand? Unfortunately it has taken much longer than visualized for humanity to evolve.

The Old Testament is truly a storehouse of prophecies. Those in embodiment today have had a great privilege given them as a reward for past service. They have been given a chance to set things straight. But now that they are here on the earth, they have gotten caught up in the materialistic world in spite of all the good intentions not to.

Let people reread the Old Testament slowly, one book at a time, with an open mind as to the facts that they are reading there. Let them decide for themselves if it is true or not. They will know deep in their soul if they made this promise before entering earth's plane. They will know, and once this realization is upon them, they will be unable to follow the old teachings any longer.

The important thing for them to remember is that God is not a giant man or woman sitting on a throne overlooking earth, and watching every little thing that every human being does. Neither does he have a magic wand that he can wave, but he does have a lot of help from high-

ly evolved beings. This is where direct help for humans comes from, but these teachers and guides do not want to be worshiped, only to be treated with consideration and respect and they want those in their charge to use their intelligent mind.

### **New Testament More Tampered With Than Old**

The Old Testament had the truth as its foundation for the tales. It has not been and was not deliberately tampered with except for the parts about spaceships. The New Testament did have the most important points deleted from it through the years. Some were deliberately deleted, others through translation problems. The deliberate ones were done simply because someone in authority at the time simply couldn't fathom certain ideas, such as reincarnation for one.

Unintentional deletions and discrepancies came into the New Testament because when the disciples wrote their stories they were colored by the society of the time. Also, some of them were on ego trips. Some of them hadn't come down from the clouds yet, (a figure of speech) but none of them deliberately tried to mislead anyone or to change anything. It is simply a fault of human nature that when they wrote them, they were excited about all the events and stretched the truth, just like the proverbial fisherman's story about how long the fish was. It kept getting longer every time he told about it.

The real villains came afterwards. The men who deliberately denied humanity the right to know of reincarnation. This was probably the single, most far-reaching crime ever perpetrated on humanity and these men will be paying for eons for this. Who were they? The first ones were Catholic priests in the days before the Reformation. Martin Luther had the oppor-

tunity to put this information back in, but chose instead to leave it out. He is just as guilty as the others.

There have been more that could have restored the truth, but as time passed, the opportunities to do so came less and less frequently.

## **The New Testament - The New Creation (The Seventh Day Biblically Speaking)**

### **The Story of Jesus**

Jesus was from a different star. Mary was artificially inseminated by a spaceman chosen for this mission. The spaceman did not have sex with her. It was done by a process through the skin. It is hard to explain and not understandable by us at this time. The necessary factors are assimilated through the skin, similar to a spray-type deodorant being used now, only it penetrates through the skin and enters the organs at the right time and place. This method is not in use today as it is an outdated practice, but was in use during Jesus' time. There was a pure infusion of genes at that point. From then on the artificial inseminations were not pure, but were of a hybrid strain from other planets that had earlier received the pure strain.

People were not really able to grasp Jesus' teachings except for a few highly enlightened souls. That's why he used parables to teach, to bring it down as much as possible to the stage of evolution where they could grasp it. Not too many could, even then. That's what is happening today. There are just a few enlightened souls who can understand what is being said today, although more are becoming ready and need to be given the opportunity to hear the truth.

### **New Testament Accurate Account Of Physical Life But Not Spiritual Teachings**

The Old Testament is an historical account of the colonization of earth. The New Testament is a fairly accurate account of the physical life in that time period and of Jesus' life, and has a lot of good common sense advice and teaching in it, but the teachings he gave, having been given in parable, have been misinterpreted for the most part. They have been reworded because what he actually said seemed too simple, so they were elaborated on. He kept them simple to reach unevolved man, but as they were added to, their meaning was changed.

He was able to use his psychic powers much more than anyone can today simply because the atmosphere was not as contaminated then. It was not so thick and heavy. He had no more psychic power than many on earth today, but was able to put it to better use. Also, he was one of the very few in whom this power was developed at all in that time period, not like today when it is developed in many. He stood out from the throngs of people as a very special being and had many followers.

When he returns, he will not at first stand out until the time is absolutely right. Then he will let his presence be known very simply and quietly with no fanfare. But those waiting and watching for him will immediately recognize him. There will be no doubt in their mind when they see him. They will know.

But first will be others making the claim of being Jesus the Christ. One is ready now and will make this claim in the near future. He will be discredited almost immediately and there will be others. But the true Christ will come from the most unexpected place. It will not be through any church.

Jesus wasn't put on the cross to save anyone or take away anybody's sins. He went to the cross

so he could rise again to serve as proof of reincarnation and eternal life – no other reason. The more tears shed over his crucifixion, the harder to break the hold of the illusion that He died to take away our sins.

But think of the trust he had to have in His divine Father, (spacefather.) He had absolute trust in Him and belief that we live forever. He didn't gain this trust overnight. He went through many long days of indecision and pain before realizing deep within his soul that this was His mission. He had tried to bring this to His teachings, but ultimately had to go to the cross as a final emphasis as to what he was saying and teaching as far as reincarnation and eternal life.

The message was gotten to the people of the fact of eternal life, but not correctly. They still picture it as a eternity of floating around a beautiful heaven because He earned it for them. When will they realize that neither He nor anyone else can earn this for them? To begin with, this is not their goal. Secondly, no one can earn it for them. Every inch of the way has to be done by each entity himself. No one else can evolve for him. No priest can forgive him. No baptism can wash his sins away. What sins? Those deeds that are against universal law. Their conscience will tell them what they are.

The big thought-form that He died on the cross to save our soul simply isn't true. It's not that easy. We have to earn that goal by our own hard work on ourself. This thought-form needs to be shattered before any progress or understanding of the true nature of evolution can take place. Those who want to be with their heavenly Father must break the old thoughts and reread their Bible, knowing that NO ONE DOES IT FOR THEM. Will they be able to understand what is being said at this time?

## **New Creation Supposed to Start with Birth of Jesus**

The boxed-in effect that many feel today is because the minds of many need to have the expansion of wondering about things. The world as we know it cannot continue. It must expand outside its narrow confines. The coming changes must take place for this expansion to take place. The season when all will know that the time is short is soon to be upon the land. The weather patterns are becoming so erratic as to alarm many. This is only one of the signs. The openness of men's minds to the possibility of other dimensions is another. People need to have this material now, as the events which will foretell his appearance are taking place even now.

## **The Plan of Jesus**

In the year 2300 there will be the birth of another star in the Milky Way galaxy, causing a disturbance again in the vibrational frequency. This will not be as strong a change as the one coming now. These events are predictable for many centuries. This is how the birth of Jesus-Sananda was predicted. (Sananda is his universal name.)

The astronomers are going to have a field day with the birth of the new star which will precede the earth's shift on its axis. The shift will take place when the energy waves have traveled the distance needed to reach earth. The excitement of the birth of this star is going to overshadow all other news. The vibrations zinging through space, preceding this bubble are affecting life everywhere.

The physical form and the mental body are made up of energy; therefore humans are very susceptible to any degree of change in vibrations. This is causing many problems and will

continue to get worse. The only way people can be helped is by knowing and accepting the truth of their origins. They must accept the fact of unending existence, as this will be the most comfort they can receive.

This was what Jesus tried to teach them, but most only give lip service to believing it and truly don't believe it. They seem to think that the physical form is all there is. When they understand the coming together of the genes from space with the animal forms, the merging and the struggle for control of the form and the death of the form and return of the spirit to experience again and again in new and different forms, they will eventually accept the truth, as it has to strike a familiar chord somewhere along the way.

### **The Roman Empire**

The days of the Roman Empire, when the birth of the Christ was predicted, were filled with an energy almost electric in appeal. All were awaiting the birth and none were sure when it would take place. It could be five years or fifty years. There was no definite time that the people could know. The same is true today. He will appear when the time is right, be it five or fifty years. But all must be ready. There can be no time stated, because no one knows the exact time when his appearance will be needed the most. He is on earth, but unknown to all. Events in Rome preceded his birth for a long period of time also. The Christ is not someone born to this purpose this time as he was last time. It is someone who will assume the office out of a desire to help humanity.

The day when the Romans issued the decree to kill all male infants was a black day in their history. The emperor Claudius did not want any competition to the lineage of the throne, as his wife was expecting a child at the same time as

Jesus was reported to have been born. The prophecy of his being the Prince of Peace and a King of Men made Claudius afraid that when this newcomer grew up he would try to grab the throne from his own son, which is what he hoped his child would be. The child was a son, but grew up to dislike his father and ran away eventually to join the group around Jesus. This was the disciple John. Claudius never knew what happened to his son. It was ironic that it turned out as it did.

It was planned that John do what he did before he entered. He was adopted, or rather went to live with, a family who took him in and treated him as their own son when he left the home of Claudius at age ten. This family never knew his origins and he blended into the family life and his father could never trace him. This was a form of instant karma for Claudius, because this son was his whole world and this was karma for issuing the decree to kill the male babes at the time of Jesus' birth.

[I here add a footnote to the effect that history is wrong in calling this line of emperors the line of Caesar. It truly was the family of Claudius. It is the one known to humanity as Caesar Augustus but as other events and facts surrounding that period of time are in error, so also is the name of the line of Roman emperors. I must stress that I am not trying to correct this in humanity's mind, but merely want to state this as a fact. Even though known as Caesar Augustus, he was Claudius Augustus – actually Claudius Augustus III. The name was changed to Caesar Augustus by one who thought he was doing the right thing by changing a name he thought was wrong.]

### **His Birth in a Cave**

The events surrounding the birth of Jesus are

not accurate as stated in the Bible. Jesus' birth took place on May 27, A.D. 2, as we consider time. It got confused in the thirteen hundreds and became December 25 due to misinterpretation of the writings. The birth date was chosen with much care and concern about cosmic events. The Bethlehem star was to be at its brightest flare at that time and the planet's influence that was needed for Jesus' mission was to be exactly right at that time, and Mary's ovulating rhythm was exactly right for the birth to be planned down to the exact time of 6:13 PM in that part of the world.

The census was to be taken on the first of June, and they were late because they had rested three days and still had two days' travel to reach the city. On May 27 they stopped to make camp for the night and Mary was preparing the evening meal. While she was preparing the food the first indication of impending birth started.

There were three other families traveling in their caravan. They debated moving on and traveling at night until Mary was too uncomfortable. The three women decided that Mary could not travel and urged the men to continue the journey while they stayed with Mary. Joseph would not leave Mary, so he and the three women stayed. The other three men continued with the journey with plans to register for Joseph after explaining the circumstances. This they were not allowed to do, hence the fine. The birth took place in a cave, not a stable, as this is what was used in that area as protection for livestock. They never were turned down at the inn. They could not pay for a room in the inn so never inquired about one.

The three women were midwives for Mary, who was not fearful as she went into labor. All went well; the birth was easy. It was a very

short labor and for this Joseph was thankful, as Mary was tired from the trip and he was also. When the child was born and laid in Mary's arms, not a cradle, Joseph fed Mary warm milk just gotten from the goats that had been using the cave and also some bread and cheese they had been carrying with them.

### **The Census**

Mary rested three days; then they continued on into the city to be counted. As stated before, the count for the census had been taken by the time they arrived in Bethlehem and they were penalized for not being counted. At this time they were fined; unable to pay this fine, they returned home with this debt hanging over them. Joseph worked many long and hard hours in the carpenter shop to raise the needed payment.

### **The Wise Men**

The three wise men, who were really eight, were all prophets who had been told all their lives that this event would happen and at what time they could look for it. They had been watching that star (the star of Bethlehem) for years and looking for signs that it was beginning to burn brighter. There was a ten year period prior to Jesus' birth that the star was growing brighter and the climax was planned down to the last minute. It was known by the spacemen when the star would be burning at its brightest flare because of other celestial events that were taking place in its proximity. Knowing the way the unevolved mind of humanity felt in awe at any celestial show of any kind, the birth of Jesus was planned to coincide with this event, the same way the unveiling of the Christ this time is planned to coincide with the cataclysms. It is all planned far in advance. If people could only believe this a little stronger, they would know that nothing

happens just by chance in the Creator's universe.

The wise men journeyed for many days on their travels to see Jesus when he was born. It was the start of an exciting new age then as it is now and to be part of it now will be glorious. As stated before, the three wise men were really more like a group of eight wise men who had known of the expected birth all of their lives. It had been passed from one generation to another as even today it is still passed (the news of His return) from one generation to another. It will not be the same but, if anything, will be more needed and welcome. When we commemorate His birth it should be a time of rebirth for all. It should strengthen our beliefs and give us strength and courage to face the future and the events that have to precede the coming new age.

### **The Essenes Were Jesus' Teachers**

When Mary was inseminated for Jesus' birth, it was once again a pure shot of genes. Therefore, Jesus was of a higher evolutionary track than most on earth, except for the Essenes, who had kept their group apart from others. They were spacemen from the planet Venus who had originally done the mating and had stayed on earth but had not ever mixed with earthlings. Their heritage was pure, but not as pure as Jesus'. They were the most highly evolved on earth at that time and it was planned that they be Jesus' teachers until such a time as He no longer would need them. They taught Him all He knew of the universe, of astrology and attitudes, etc. until He grew and raised His consciousness enough to be in direct contact with His inner being.

### **Lessons With The Essenes**

Jesus lived for a time with the Essenes. He

studied quite a while with them. It was a pleasant, easy interlude in His life and a most necessary period. He was thoroughly trained at this time to be able to immediately transmute bad thoughts or negative reactions to people into loving vibrations.

This is a very difficult area to work in. It is likened to pushing a button on a computer today. He was able to do this instantly. The power of the mind is what is used. This vibration immediately attracts and draws others to one. Some do this automatically even today without realizing it or being able to explain it. It can be learned by others once the technique is known and practiced. It is a controlling of one's energy and transmitting it to a certain area instead of letting it automatically disperse itself over a wide area at random. If used for the wrong purpose, it would be black magic. If used for good, it would not. When a bad reaction starts to well up in one, deflect it outward with a thought of light. It is a simple act and if practiced over and over, it will become automatic. It is as though one must tell himself to push a button; in fact, actually pick a spot on one hand and pretend to push a button; this will help.

He learned this well and used it thereafter the rest of His time on earth when upset with those around Him. He had many other ways of working with people also. When with the Essenes, He was quite content, and at stressful times later in His life, He would will Himself back to that time period to feel the peacefulness and be refreshed.

The Essenes taught Him to be humble and simple in His teaching. To accomplish this He needed to always feel calm. This is why it is important to have a spot to slip to, if only for a second. Their teachings were some of the most

influential in His life as far as His well-being was concerned. They taught Him internal fortitude which stood Him in good stead in the trials of His life. They used a young woman to tempt Him and emotionally tear Him apart. It was staged deliberately, but it taught Him emotional control which was needed so desperately later. It was deliberately set up by His wise teachers in the Essene group. Jesus realized it later, but went through a terrific upheaval while going through the training.

The time when he rode into Jerusalem was a time when He needed to have this emotional fortitude as He knew what was coming and did not want to display fear in front of the crowds. It took every bit of strength He had to get through that part of the play-out. His time spent with this group was low-keyed and relaxed. Days were spent fishing along the Jordan River and studying animal behavior in the fields around the homes. Animals have stayed true to nature in their behavior and as a result of the time Jesus spent in this manner, He was able to use animals in many of His teachings. His teachers, the Essenes, were a grouping that has reincarnated together many times since then. They came in together in the Quaker period also. This group has always been more evolved than most. They are the pioneers now for the new age.

### **Space Friends**

*“Once I was able to be in constant communication, my mission truly became all-consuming. Until then I had lived with the family, helping Joseph in the shop and helping in the garden with my siblings. Once this contact with my heavenly Father was made, all else faded in importance and as stated earlier, I started my mission in earnest.”*

*“I was constantly in touch with my space friends and quite often went with them at night. I would be gone a few hours from my sleeping body and receive several weeks training during that time as even those today are doing.*

*“The space ships were visible to me all this time and I was in communication at night for much study and guidance. This knowledge would remain buried until it was needed and then I could pull it forward when I wanted. Everyone has this same ability. The disciples I gathered around me were no different from the friends people have around them now. They were ordinary men, friends of mine, who realized that I had an ‘inside track’ to knowledge that they were not open to. Bless them dearly, for they had more faith in me than I had in my own abilities. They have ever been with me off and on since then. Some have been back on earth, but it seemed no longer than if they were on a short trip.”*

### **Healing**

The physical healings He did and those being done now are all done with mental power, mind control. There is a way that this can be done instantly, but takes one in whom the psychic powers have been honed to their sharpest degree. This healing power potential is latent in all humanity. Very few ever develop it and certainly no one has ever developed it to the degree that Jesus did. This was part of the plan of His incarnation so He was well grounded and trained in this before entry. The mysteries locked inside the pyramids explain this training and give detailed instructions as to how to develop this potential. If these were to be found by anyone today, they would be used for mercenary purposes.

### **Miracles**

The far as stories of other “miracles” He performed, most were blown out of proportion in the retelling. He did on several occasions, make use of levitation and solar power but never used suspended animation, though He was capable of it.

The human race simply is not developed enough to be able to do miracles on a daily basis. It has nothing to do with the spiritual growth. It has everything to do with physical evolution. It would have to do with the combining of genes that takes place before the entity is born so there are limitations on what we can do to create our own reality. These limitations are imposed by our physical body. There are no limitations to creating our own reality when we leave the earth plane, as earth is the only plane we will progress through where we are caught in matter and have this limitation imposed on us.

We cannot walk on water because our flesh and bones do not have the buoyancy that is needed to walk on water. They do not have this buoyancy because they do not have the right DNA makeup. Jesus was one who had this makeup way before his time. He had a different DNA structure, a much more progressed DNA structure, than anyone has had before or since.

Humans will eventually evolve to where they can do miracles in the physical body. The mental body, the animal based brain, will have much to do with this progress and it is progressing quite rapidly. Do not misunderstand. The DNA must progress first. The actual atomic structure of the human form must progress first, to where the buoyancy of the form would be there. Then it will be a combination of the animal-based brain mind and the desire of the soul wanting to do miracles that will allow it to

happen. This will be, perhaps, between 500 and 1,000 years into the future before this will take place.

Jesus gave off very strong vibrations, much stronger than any today. Perhaps only because of the purer atmosphere, they seemed stronger and could be felt by those who got near Him, even though these people were not sensitive. The mystery of honing which can be described as being like the purring of a cat, is what enabled Him to have these strong vibrations. Honing can be used to repel or attract, whichever is wanted or necessary. He used it to attract the people. He was truly a great psychic and still possesses these powers today. He has never used any psychic power for anything other than good.

### **The Receiving Of The Christ Consciousness**

*When the Christ Consciousness was bestowed upon me, I was totally unaware and unconcerned as to where or why it happened or even what it was. I remember approximately when I reached that state, but there was no definite turning point. I just realized that I finally felt at peace with what I believed as far as my spiritual life was concerned and knew without a doubt that I had to do what I could to try to help others achieve this wonderful sense of peace and fulfillment. This was the impelling thrust of my mission: knowing that what I felt and was capable of, others could also achieve.”*

### **The Plan For Him To Be A Martyr**

In Biblical times spacemen were very abundant, but not living among the people as they are now. They kept themselves apart and communicated with those necessary in isolated spots. This is why Jesus spent forty days in the wilderness. He was communicating with the

spacemen, going through His own inner battle of whether to believe the spacemen or not. They told Him that if He allowed himself to be a martyr, they would be able to restore Him to life. This was their way of trying to teach earthlings that they had a divine spirit that was there before it inhabited animal forms and would be there after the animal forms died. In Jesus' case they assured Him that His spirit would take on a form that could be seen by others so as to help humanity believe. After weighing all this and placing His faith and trust in the space fathers, He agreed to follow their plan. They engineered the whole payout like a stage play.

The high evolution of Jesus was a surprise to the spacefathers. They really would rather have waited a while longer till humanity was a little further along in evolution, but they realized that He was perfect for the part and that some of the people were ready. This small number of ready people were the early Christians. This is why He is to make His return today. The earlier payout was staged too soon. Humanity simply wasn't ready then. Many more are now, but not as many as could be hoped for. There are those who at the moment seem as though they are not ready; but who will, when faced with the truths, immediately recognize the truth and be instantly ready.

## **The Crucifixion**

*“The days preceding the actual walk up the hill were very bitter for me, as I thought the space fathers had deserted me. They had to do this to me so I would react very authentically on that morning. I almost did lose all hope, but when I looked up, I saw them up there and regained my strength.”*

*“At the crucifixion many saw me rise bodily off*

*the cross. The storm clouds were overhead, clouds made by the spaceman so the space ship could not be seen. The sentences that I uttered while on the cross were, ‘Father, forgive them for they know not that they cannot destroy me,’ and ‘Please guide my spirit with your hands.’ In other words, point the way to the space ship with the beam of light so that I would not get lost. Those on board beamed my ethereal body up into the ship. The physical form was left to be buried. It was no problem at all to remove the stone and disintegrate the body in the tomb. The shroud of Turin is indeed what was wrapped around me, but the me, the essence of me, was up above in the space ship. The laser beam made my ascension visible to all those watching. In an ordinary death of the human form, most cannot see the ethereal body ascend, only those with clairvoyant vision. It was planned to make this visible to those who were clairvoyant. When I appeared to Mary, it was as a walk-in. I received permission to use the body of a man who was a stranger to Mary although I knew him. It was planned by him and me ahead of time. His name was James, known to a few of my disciples to be part of the plan, but not known to any of my family.”*

*“The whole scene was written and played out like a great stage play, with all the actors in place at the right time. Even the words I uttered had been rehearsed. As above, so below. It had all been played out in the inner planes (upper levels) of earth. We knew the whole plot. What we didn't know was what would happen to the retelling of the events as the years went by. This is when we realized that mankind simply had not been ready even then to believe the truth. The simple truth is, MAN IS NOT ALONE IN THIS UNIVERSE. As a matter of fact, he is way down on the evolutionary ladder.”*

Perhaps by now you are beginning to get the

picture of why the Bible must be brought up to date. I am not trying to denounce God or Jesus, I simply want the truth about both of them to be told, simply and glowingly to all who will listen.

### **Evolution of Humanity Needs Free Thinkers Not Closed Minds**

Without free thinkers, the evolution of humanity would progress nowhere. It could even conceivably regress and will if some fundamentalist religions have their way. It should frighten and anger people to realize that closed minds could undo all the good of the one teacher who did indeed enter to “save” them; but save them by trying to educate and enlighten them, not “save” them by being crucified on a cross. This is the only way any of this can be accomplished is through education; early education is the fastest way.

He was indeed humanities’ “saviour” at that time period, but evolution continues and a new “saviour” is needed now. How long can one man’s teachings stretch to “save” people? He, himself has gone past the “teachings” he once gave and is trying and has been trying to update them. As he, himself, has grown and evolved, he attempts to pass on new concepts to humanity to update his previous ones.

Wouldn’t a professor in a high school or college do the same thing? As they upgrade and update their own education and learn new theories and concepts and experiment and test and prove them, wouldn’t they try to share these with their students? To not do this would not make a very wise teacher, would it? Doesn’t humanity think that the Christ is wise enough to want to update outmoded concepts that He once taught to His people. This upsets Him, that they won’t give Him credit for being that

wise of a teacher. These teachings coming through at long last are the best effort so far by the Christ at updating humanities’ outgrown “clothing.” How long can they go around with clothing that is too small, too tight; that constricts and binds them and keeps them from expanding? How also can they ever hope to see Him if they do not keep pace themselves with His own growth and evolvment? People must use their intelligent, reasoning mind and expand the cells within their universe to take advantage of their unused gifts.

### **A Final Message From Jesus Sananda**

*“The days of man’s walking uncontrollably over all things on earth must soon end. It can be this way no longer. The true God within each must be a wise, intelligent God, a pure reflection of the heavenly God. There is no way to accomplish this without understanding the simple spiritual concepts given in the Chrysalis Teachings. They are the least essential criteria for one who aspires to a better world to understand.”*

*“When I was here two thousand years ago, there was no way that man, at that stage of evolution, could have understood these concepts. This is not so today. We expect more of people in this cycle than we did in the last. The message for all is to love one another. When you demean, hate, fear, or belittle another, you are doing it to yourself also.”*

*“When the Christ reveals himself, before the end of this century, he must know that he is dealing with intelligence, not old, out-dated concepts. This intelligence must come forward, as far as spiritual beliefs are concerned, and make itself known.”*

*“Those of you who know the facts in these*

*teachings to be true, and those of you who do not believe the churches have the facts right, must stand up and be counted. There is no longer any time left to sit on the fence or pretend to follow the beliefs of the churches. You must all come out into the open and start expressing your views. Certainly this will take courage; the courage of your convictions, but we need to have your strength of belief to ever lift earth up out of the grave she has dug herself into. The path that my disciples ever must walk is rocky, thorny, always difficult, never smooth and easy. Let those whose path seems to be easy wonder if they are on my path or not. The time is now. The minds of men are going to have the final say.”*

*“We love our people and want them to see how glorious and beautiful life really can be. We need support for these truths of our existence to be given publicly and privately. The more support and belief in man’s divine heritage, the more certain he is to be able to achieve his inheritance. Ultimately it is up to man himself. Free will will be the victor.”*

## **Visionaries**

The visions that so many are seeing today are seen correctly, but the interpretation of the visions is what is usually wrong. The interpretation is always colored by the individual’s personality and environment. It can’t help but be.

The visionaries in Biblical days had the same problem. They, in fact, had greater error in the interpretation than those of today. The events that eventually took place in the New Testament were foretold by prophets (channels) many centuries before they happened.

In the Book of Revelations, the visions of John were misinterpreted by him and even worse misinterpretations were made down through

the years by so-called Biblical scholars. There has been much more significance attached to them than should have been. They were given to communicators and repeated word of mouth before being gathered into book form.

This is true of most visions even today. So many of them are strictly personal – in other words for that particular soul to use as a guide in his own personal life but, because of an inflated sense of worth, they think they need to give them out to the world. The truly divine seers will not shout their visions to all. Nostradamus was one. Edgar Cayce another. Jesus was one of the greatest. Some were capable and did see visions, but chose not to let them be known. Confucius was one of these. The misinterpretation of most of the visions and prophecies in the Bible was due to excitement at the time of the vision, and lack of knowledge of metaphysical events. Misinterpretation by translators added much to the confusion also.

For instance, the Holy Grail was a prophecy that was greatly blown out of proportion. It was given as a guide to a certain knight as a suggestion of a place where he would find personal happiness. The vision had shown him sitting in an abode in the south of France drinking from a cup and eating, with a feeling of great peace. His guide and teacher was letting him know that he had relatives in that area and had also lived there previously (in a past life) and would find peace and contentment there in this life. Thinking that he was more important to the world than he was, he immediately told all who would listen, that the Holy Chalice, used at the Last Supper, would be found there and organized a group to go and search in the south of France with him. Due to misinterpreting the vision, he disrupted many lives for many years searching for something that wasn’t there. The chalice existed, to be sure, but not in the south

of France and what purpose would finding it have served anyway. It was just a drinking cup.

The revelations of John were misinterpreted, as stated before. They were meant for humanity, but were filtered through him more like a nightmare than a beautiful vision that they were supposed to be. The dreams that many could write down today could be taken and made to apply to something that was to happen two thousand years from now and, because there was such store set by them, they would come to pass. Thoughts are things; you shape your own world and with so many reading the revelations of John and giving such power to them, they did happen and will continue to happen if not stopped being used.

The only visions or prophecies that should be made public are the ones that show a better future or some great stride forward in evolution as a goal for man to build his world upon, the rock for his foundation. As long as prophecies of doom continue to be written and published for so many people to read and dwell on and

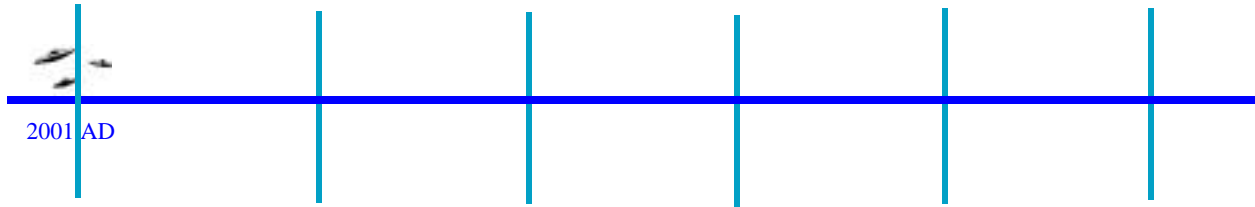

fear, they will be brought to pass simply because of the mind power given them.

The book of Revelation is one that should have been deleted many, many years ago, but still it is read and dwelt on, more now than ever. It needs to be replaced with visions of a brighter, more hopeful future so that this is what is used for building the new world.

Prophecies can be used and should be used only as things to be on guard against, evils that could happen, but not to be dwelt on and feared, only so the indications of these evils may be recognized and stopped in their tracks before they do become facts. Mind is the builder; thoughts are things. What a mass thought can do is enormous. If it is of doom and catastrophe, then this is what will take place. If it is a thought-form of beauty and goodness and hope for a better future, then this is what will shape up. Watch your thoughts, Humanity, you may think yourself out of existence! It could happen!

Today

## CHAPTER TWO

# The Development of the New Creation

### **Bible Is Historic Account Of Spacemen's Colonization Of Earth**

The total Bible could be said to be an historic account of spacemen's colonization of planet earth. It is their colony and they love it, but feel so totally dismayed by what has happened to it that they simply must clean it up. Wouldn't we on earth do that with a satellite we put up in space for people to live on? If it got so polluted and the people were unable to get along and it was on a self-destruct course, I'm sure our government would take the people off and do all it could to clean it up and the next ones to be allowed to live there would be of a much higher caliber human – much more evolved. They wouldn't be perfect, but would be way far ahead of the animalistic, materialistic ones who had inhabited it.

To get a better picture of earth's history, visualize it as a satellite that has been formed in earth's image and left to evolve as earth was. It is as easy for us to get to as it is for us to get to our moon. We would watch and help it as long as it needed us. Is this not true?

### **Spacemen Went Through Same Stages Of Evolution As Earth**

Spacemen are highly evolved, but went through

the same stages of evolution that mankind on earth is facing. Like wise parents they know that the children (humans) must find things out for themselves so they can learn. They know they cannot, must not, take this away from humanity. It is against universal law. They are always there watching, giving guidance when needed and stepping in during emergencies to avert disaster, the same way parents would do with their children. The whole universe is patterned thusly, has ever been and will ever be. Know this – that we are not alone.

### **Progress Is Mathematically Timed**

All is on a mathematical time scale and these teachings are needed and necessary with no time lost, as the Bible story cannot be taken literally anymore. People are far too intelligent, but there needs to be the true teachings to replace these tales.

The true teachings are, of course, the truth of reincarnation as the basis or foundation for all. The concept of the God Within must be understood, not an external God sitting on a throne up in the sky somewhere – “The Kingdom of God is within.”

Humanity is progressing much faster now and seventh root race egos are clamoring for the

right to come into incarnation. They need to have the new teachings to precede them. Most of humanity now is of the fifth root race. Some are of the sixth root race and those waiting up there to return are of the sixth and seventh root races. Those of the seventh know they have a long wait because many more sixth root race have the first opportunity. It will be far into the future before the seventh can begin to come it, but remember they do not consider time up there, and even though these ones know they must await certain events, they are eager to return and try again so they can “get on with it,” a little impatient, so to speak.

The word death frightens many, but the death of the people who will not come out of the darkness of old concepts and come into the light should not be feared but rather looked upon as another chance to wipe the slate clean and try again. They will get a second chance and a third and so on through reincarnation. The spacefathers are above earth waiting and watching and they know each one who refuses to see the truth. So the death of their form at the time of the cataclysms will be an act of mercy as they are at a standstill in evolution. They may as well leave that incarnation and return to the inner planes where they will receive much help and wisdom, so that the next incarnation will be more fruitful.

### **Humanity Needs To Understand That God Is Part Of All**

The Creator is over the whole universe. He is the whole universe. He is every atom and molecule of everything. None are apart from Him, nor can they ever be, as they are the Creator. This is so important to stress. The real true divine Creator is a part of all, and each of us is related to that all. These New Millennium NoteBooks are not trying to take the Creator from anyone, they are trying to give the

Creator to everyone.

It is time for humanity to understand this and many more facts that they were too unevolved previously to understand. The Biblical stories that amounted to fairy tale quality do have a true foundation in fact. Humanity can now understand that the splitting of the divine spark was the real meaning of the story of Adam and Eve. This story should not be taken literally as it was seen and sent down and related from an overview. Eve was no more pulled out of Adam than Adam was out of Eve. They were split or pulled apart, if you want to use the term pulled, but it really was just a matter of not being allowed to reincarnate together on the earth plane ever again. Adam stands for the male half and Eve the female half of the divine spark. When the Bible said that He took a rib from Adam and formed it into Eve, it was not talking about the physical body. That physical body developed at the split of the amoeba into male and female at the same time the split into the animal kingdom took place. Those forms grew into male and female, at least most of them did. Some of them did not. It depended on the split of that amoeba and the way the cells divided.

Having only one half of the divine spark in incarnation at one time has worked much, much better. There are still many problems. Each individual has his own identity problem, due to being only half of his whole self that is able to function on the physical plane. The half in incarnation must learn to listen to his soul, his other half which stayed behind to guide the lifetime from behind the scene.

The progress of the race was determined to be going according to its time plan when, in the third century B.C., a delegation was sent to earth from Darius to judge it and ways were thought of at that time to relate to humanity

their origins. This was the plan that Jesus carried through. It was realized later that it took place too early. Many plans have been tried and scrapped since then.

There has been no attempt since then to tell humanity about their origins as it was determined that the genes that were infused into the race were like time-delay capsules. This was not intentional, but nevertheless this is the result of the mating. These time-delays have been twice as slow in releasing their built-in knowledge as they would have been on the planet they came from, due to the dense animal bodies into which they were inseminated. The knowledge is just beginning to explode inside some people now like the first stage of a time-release aspirin. Those in whom this first release has taken place must pursue more knowledge. They must attain that next time-release; they must always strive for higher releases. It is almost like being hooked on drugs, so to speak, as it becomes something we cannot live without, this knowledge, this thirsting after information as to our origins and also our ultimate goal. The first releases have taken place and many are nearing the time for the second release of the time capsule. There are a few in whom the third explosion has taken place. It is the releasing of the third stage that indicates to the Hierarchy when one is ready for more information about their beginnings. Many are nearing this and the information must be available to those seeking. Pioneers need to break new trails, new paths. Much of the information coming into the earth plane today deals with the transformation of attitudes. Now the truth of man's divine heritage needs to be known to help the attitudes prevail.

The Biblical truths are all so simple that one wonders how man can have messed them up so badly. It is the utter rejection of life on other planets in other solar systems that is the basic

cause of continuing ignorance. This will change in the near future and things will speed up enlightenment. The truth must be available as this is going to shake everyone's foundation. This will be a big test for most of humanity.

Each stage of growth is definitely a part of the overall plan for planet earth. Each stage has been fulfilled pretty much on schedule until now. This last part of the plan has not materialized according to the time span allotted to it. This is the direct fault of the churches. They have taken teachings that the space fathers gave to humanity in the cave man stage of evolution and never let these teachings keep pace with evolving humanity. Consequently, today they are basing their teachings on what is equal to a fairy tale for children with a hint of right or wrong action in it. They are doing much harm by holding back the evolving man from reaching his full potential of a divine soul. This is the ultimate goal for humanity.

Some of the souls leading the churches came in with every intention of breaking through the hold of misinterpretation that the churches have woven around themselves, but they were not strong enough. People should use common sense and a reasoning mind when reading the Bible. They should not think of the Creator as a sleight of hand magician. They should think of Him as an intelligent, thinking, reasoning presence on whom they can depend to always be fair and impartial in His acts. He must be; He is universal law.

The ten commandments are a misinterpreted teaching of the churches. It simply never happened that way. The same is true for sixty percent of the Bible. It is a collection of tales. Would it make sense to continue to teach children with fairy tales as they grow into adulthood? But this is what the churches continually feed to questioning humanity. Until these

teachings are updated, there can be very little evolutionary progress made by man.

The act of baptism was meant to be a symbolic start of the intention to try to achieve an integrated state. It never was meant that baptism had to happen or you would be condemned to hell forever no matter how hard you tried and how well you succeeded in joining your higher and lower selves. Would this make sense? What possible good can a few drops of water on the head, or even a full immersion do for the atomic powerhouse inside that head? The full immersion might cool the external area, but other than that, how can it possibly have any effect, even if the one performing it is a minister or priest. He or she is no different than you are. They are not in any way capable of washing away your “sins.” The only one’s “sins” they can have any effect on are their own misdeeds against universal law. This, by the way, is the true meaning of the word “sin” – a misdeed against universal law.

The only way baptism could possibly have any meaning is, as said previously, as a symbolic start on the quest for joining your dual natures and finding the intentions of your soul when you entered the earth plane. But baptism is not necessary. The start on this journey is purely personal and needs to have no outward symbolism. It must be an individual search and accomplishment.

Communion is also symbolic. It is a symbol of wanting to be like the Christ was. It does bring people to the spiritual thought table more often than they would come if they did not have communion, but it is symbolic. Some churches believe it is the actual body and blood of the Christ who was crucified on the cross. Even if the minister or rabbi or priest who blesses this bread and wine has the powers of the Christ, there is no way that it can be the body or the

blood of the Christ. It is symbolic. Please realize this with an intelligent, reasoning mind and accept it as symbolic and go on from there.

The act of taking communion is significant of the joining of the higher and lower natures into a synthesized, total being. This is when there should be a celebration, as those in the higher planes rejoice when they see this take place.

Communion should be a ritual that is only allowed after the higher and lower natures have been brought together. This was the original, true meaning of communion, the bread being symbolic of the lower nature and the blood symbolic of the higher nature. Only the individual will be aware of when the synthesization takes place. The celebration of communion is a very personal act and his conscience should guide him as to when he could participate in it.

### **Born Again Should Be Rebirth Into Continuity**

Those leaders who stand in front of their congregations and exhort them to give their life to the Lord and be “born again” are bringing much terrible karma on themselves for this is the biggest sin that one could perpetrate against another.

The true meaning of being “born again” is a “rebirth into continuity.” A true rebirth of continuity will be painful, but will be from deep within, instigated by one’s own soul – an esoteric happening not visible on the surface to those he meets.

A false happening of being “born again” will be but an exoteric display, perhaps a superior acting job on the part of an individual for the sake of the picture of himself that he shows to the rest of humanity.

The true meaning of being born again has to do with the rebirthing process of all components

that make up the earth plane. This is what everything is, a component making up the whole – the splitting of the atom. As the Creator shattered Himself into individual sparks and entered Human bodies, so also does the human, at the same stage in evolution, shatter himself. This shattering releases the human's former incarnations to enter the bodies of micro men, who are the teachers and guides of our inner contact. An entities' former incarnations are in time and space and, up until this shattering, are in a vacuum inside the mind of the human. The shattering allows them to take form and rise up and expand into the universe. It frees all the knowledge and wisdom gained in these other lives, making this wisdom available for others to use. This also begins the growing and evolving process for these past incarnations. This is the true meaning of the term to be "born again" for which the correct wording is a "rebirth into continuity."

Our Creator remembers the original implosion and subsequent explosion. This was His rebirth into continuity. Without it He would be nothing. He would never have existed as a perfect atom to then further creation by instigating this process in everything that came after in all solar systems, galaxies, universes, etc. This rebirth process must follow exactly in all living things in the Creator's span of time and space.

His universe is on the outside layer of time at this particular place in time. It will go into the inner layers when His time span is up. But nevertheless, if each one does not experience this rebirth into continuity himself or herself they will have to suffer the experiences over again. The original experience is painful. The original birthing process is painful, not only to the Creator, but also to the created.

We are the created. We have our own memories of the original explosion in our core. If we

could but for a moment relive this by "remembering," it would encourage us to aid in this rebirth taking place in this time frame, so that it is not necessary to go through this traumatic experience again. Those in whom this rebirth into continuity has taken place know and are at ease with the fact that they never have to experience the "original happening," (original sin in the church's teaching), again. This is what is meant by rebirth into the spirit or being born again. The fundamentalist churches are making a mockery of this saying. This is why it is better to use the words rebirth into continuity. When it is thoroughly understood, those who are making a mockery of the process will realize that they have not truly experienced it and will have to experience the trauma of the original birth again.

Each time they have to repeat the process, the goal becomes more elusive as the wrong interpretation becomes more ingrained into their core and the correct explanation moves further into time and space away from them. This rebirth into continuity will take place into a life only when it is desired by the individual himself. If forced to happen by an eloquent minister or friends and relatives putting pressure on one, great harm is done to an individual. People should contemplate these words and as the time comes to choose the leaders of our lands and growth processes and guidance of any kind, please apply the criteria explained in this message of rebirth into continuity.

The spiritual progress of earth has slowed down to the point of almost being stopped. The door was closed and locked after Jesus was put to death on the cross. Instead of glorifying Him by their worship, the churches have made a mockery of His ordeal and reduced His incarnation to one that may have done more harm than good. In doing this, everything He attempted to do was undone. This cannot hap-

pen again.

When the Christ returns again, there will be no powerful organizations allowed to bastardize His coming. This is why the Hierarchy is coming in advance. They are already here but have not come out in the open as it is not yet time. The plan is unfolding over the whole planet at once. It is very intricate and involves many more people on both sides, earth plane and inner planes, than anyone can imagine. When you read or hear about events in any part of the world, ponder on whether this is part of the plan or could be part of the plan. If you could get a picture of the size of the plan for planet earth, you may be able to get a glimpse of how large the overall plan for the universe is.

All those you come in contact with may be part of the plan. This must constantly be a question in your mind. When events don't go the way you think they should, there may be a reason behind it that cannot be shown at the moment. The plan will unfold in its own time cycle. One part has to be held up until another segment has fallen into place.

### **Lives should Be Based On Principles Of Fellowship And Brotherhood**

The ostrich can only keep his head buried in the sand for so long. Humanity also. They simply will have to face the fact of their beginnings and that they have been believing tales, if they really honestly do believe them.

Humanity is beginning to get a grasp on the principles of fellowship and brotherhood. These form the foundation for all to base their lives on. When this is the compelling ideal behind all action, then this universal law is working to its highest attainment. The ideas of pride and egotism and individualistic, separative concepts have been so thoroughly instilled that man is really facing a tough battle to elim-

inate these ideas. The movement into the age of divine inheritance has to get started now. It should have been able to start with the churches, but this didn't happen. The word Christian does not denote the Christ Consciousness as it should. These new teachings are for each individual to study, examine, ponder on and synthesize as he will.

One more thought... what humans think is fair and just will not be what is so, because of the law of cause and effect (karma) spreading over all previous incarnations on this planet, not just the present lifetime. They simply must understand this, and not just actions but also thoughts are taken into consideration. They write their own script after all.

There is no progress made when humanity fears its future. Until now that future has been a great unknown to him. Once he gets over the initial shock of thinking of what is ahead of him, he will be able to set better goals and work harder to attain them. As it is now, if one thinks that when he "dies" that all is ended, then his attitude is why bother to be good? Live it up and enjoy and make no improvements; what's the use, when you're gone, you're gone! The attitude of those who believe in heaven as a place of eternal rest is a little different, but still does not inspire much growth.

When will humanity accept their potential? If they could only realize what they are capable of, what great powers of the mind they do possess, they would realize more fully that they are indeed God Within themselves. They are belittling our Creator when they do not develop and use this mind power that He instilled in all of them. They are certainly not using the glory He bestowed on them. They are but poor imitations of what He expected of them. It is ultimately their own progress in evolution they are hurting. Each individual is hurting all others and

the Creator also when they refuse to open their minds to the great glory of which they are capable and start believing these truths.

A major portion of humanity will never be able to understand these new teachings. They simply are not evolved enough. When the time of separation comes, they still will not understand. The time-release capsules work much slower in some than others and the teachings cannot be forced on them. They must awaken enough to feel that there has to be more to life than what they've seen of it. This thought is the one that follows through each plane of each planet's evolutionary track. It is the time release stage of the imaginary capsule of outer space genes that was discussed earlier.

The most important decision one can make is to follow his own feelings as he is the God Within. But at the same time, all must abide by universal laws at all times. The two should not ever be in conflict. If so, the God Within has not been truly reached.

There is a double evolution-that of our divine self and that of our animal or lower nature, our physical forms. Because of this double evolutionary track, there is a double journey, an esoteric (inner) journey of growth – the development and understanding of our spiritual natures and our relationship to each and every kingdom of Creation.

Our exoteric (outer) journey, that of the physical forms we choose to cloak ourselves in over and over, are the means by which we learn and grow into fuller spiritual understanding. It is the constant repeated process that the Creator Himself goes through – an esoteric cycle and an exoteric cycle. The esoteric is between lifetimes, the exoteric, of course, is manifestation on the earth plane. The New Creation is the understanding of these teachings.

## **New Creation Ongoing**

Each religion embraces part of the truth, but only part. This is not the direct fault of any on earth today; but it is the fault, indirectly, of all on earth today because we were all here on earth, as other entities, when the misinterpretations crept in. Therefore, we all are equally to blame and we all are equally capable of correcting the wrong teachings. Some of the souls leading the churches came in with every intention of breaking through the hold of misinterpretation that the churches have woven around themselves, but they were not strong enough.

## **Each Must Help Form The New Creation**

The human heart is tied emotionally to the Biblical story. Whether we know it consciously or not, we quickly find out we are when we try to break free of former beliefs. This is not just a result of this lifetime, we must remember, but of every incarnation we have had in the last 2000 years. As a matter of fact, we helped write and shape and form the Biblical story. We must now help write and shape and form the New Creation.

Any creative enterprise that is undertaken is doing exactly that and this fact must be kept in mind by anyone who attempts to create an item that will be read, used or looked at or listened to. As said many times in the past, this is what is shaping the future.

Take for instance the Dr. Spook book. Exactly 20 years after the publishing of this book the results of his writings were apparent. The same thing is true for all books, but non-fiction is the one that will have the most effect as people realize to a certain extent when reading fiction that it is make-believe. Therefore I believe that authors and publishers should take responsibility for what is put before the public.

The evolution of humanity received its severest

set-back when the crucifixion of Jesus was misinterpreted as being an act of salvation for humanity. This concept must be replaced with that of each person being responsible for his own growth. "Salvation" means simply growing and learning the truth of man's existence. This is the only way to "salvation." Saving the soul is not the problem. The soul cannot be lost, it is never lost! The goal is for the growth of that soul through learning experiences. Education of the soul is the only way to salvation of the soul, but it needs to be education as to the "Truths of Man's Divine Heritage."

It is time to move on. Each stage of evolvement for humanity must change. It cannot possibly stay in the same mold that it has been in; it must continue to change. The Creator's world is changing constantly at every second. How can people believe that they can just stand still? They cannot!

Progress has been made, and more will be made. The more that awaken at this time, the faster this progress will be made, and the diseases and sicknesses of humanity will then have a better chance of being eased.

### **Ideal Role Of Churches**

One thing the churches are doing right is that they are serving the purpose of keeping humanity reminded that there is more to them than just their materialistic everyday lives. So even though they are not always able to help the people find their higher self they at least keep them aware that there is a higher self.

In the restructuring that must take place in our lives and in society, there needs to be an understanding of the role the churches will have in the new picture. The creative channel is available to all. When it opens up in an individual this is their rebirth into continuity. They will no longer need to have anyone else find the truth

for them, because one person's truth can never be another's.

Remember, each individual is his own universe, therefore, each individual has his own university inside himself. If this beam of spirit has not been contacted inside their own being, they are not attending their own university when they sit in church. They are attending the university of the leader of the church. The church should serve, instead, as a graduate school for the individual universities.

### **Progress And Change**

Finding the pathway to enlightenment that works for each one takes much trial and error, many starts and stops. There is an order to the stages of the path, but an inconsistent order. Several of the stages that humanity goes through could be considered as being on the same level. Churches for instance, though all having different interpretations of religious thought, must be considered to be all one stage.

### **Conscience is First Stage of Development**

The beginning of a conscience in humanity was the first stage of development of the spiritual path, and as the path continued it took so many twists and turns that it is really hard to put the stages of the path in a particular order. There were all sorts of stages in progress at the same time, but it was all more or less an upward spiral of the spiritual path.

Today, those becoming dissatisfied and leaving the churches go into a stage of metaphysics. This is a necessary step to open humanity's mind to the awareness of the fact that there is much more to be learned as far as their spiritual path is concerned.

As they go past the stage of metaphysics, they need to progress into the stage of the reasoning, thinking, intelligent mind. The goal following

this stage will be that of the synthesized human being – bringing the higher and lower selves together..

### **The Stage Of Metaphysics**

Metaphysics is a stage on the path used to plant seeds of enlightenment, nothing more. It does its job by opening the mind to the unlimited possibilities that lie within; but it has its own traps and pitfalls and far too many souls are getting stuck and trapped in them. The powers explored by metaphysicians are natural to all. They are a part of man that the churches closed off many, many years ago and all efforts to bring them back have failed. Man was meant to have these “metaphysical” powers from the beginning as far as mind power goes.

Humanity needs to be schooled in these powers and needs to understand them, but they must not get stuck in this stage. The ideal would be to use the reasoning, intelligent mind to take advantage of this mind power. Humanity would destroy itself if the powers were restored before the intelligent mind was being used.

The shores of the lake are the most dangerous to the ship. They can be compared to the experimental stages of all metaphysical work which is where the greatest danger of getting stuck lies. These stages must be progressed through before reaching the deep waters of knowledge. Therefore, those blazing new paths will always need to be on guard against getting caught up and stuck in one certain phase of experimentation. There will be an excitement at each new discovery and realization that will be contagious, but they must have no part of candles, pendulums, ouija boards, or any of the trappings of the occult. The true tools that all are given to help them as far as their spiritual search is concerned are their own intelligent minds, their dreams, and their astrology-numerology charts. There are other aids such as

counseling, but everyone has the basic tool kit within his own make-up. There will always be teachers and guides needed to correct the direction of the path if it veers off too far in any one direction.

These teachers and guides are on all levels of the path. Actually they have their own help. All reach back and help others behind them on the path. It has to be this way. One can go too far in the direction of denying the existence of a higher source of help and thereby refuse to believe this help exists. But exist it does, even if not acknowledged. It is the balance point that must be found and kept. Neither too much help nor too little.

Psychics are in a different position. They have the ability to get too much help for themselves and face the danger of not developing the God Within. Therefore they are watched and protected and sometimes even scolded by their guides and teachers. They have to keep these psychics using their minds.

Guard all you meet from getting caught in the traps and pitfalls of metaphysics. It is the path of least resistance. It is very easy to blame an outside “force” for things that happen or go wrong in your life. This is negating the God Within by relieving yourself of all responsibility for what happens to you. This is the exact opposite of what the true teachings need to be. Anything that takes the responsibility of making your own decisions out of your hands is not what is wanted, needed or necessary for those on the true path.

A scientific discipline of proving theories will make one cautious and the right attitude is needed regarding the desire to serve humanity. It must be understood that metaphysics is a stage that needs to be passed through as quickly as possible. There is a period of disillusionment at the end before you take the step leading

away from metaphysics towards the shiny, bright light of the real truth of man's divine heritage. Those studying these noteBooks (from the Chrysalis Teachings) should know that their path will be straight and true. These are the true teachings authorized by the Hierarchy and the Christ Spirit.

### **The Difference Between Mysticism and Esotericism**

Mysticism is the romanticizing of the esoteric. They are both the inner beingness of the human – the inner feelings and thoughts, and outward expressions of these inner things.

To romanticize the inner beingness means simply to give an air of mystery to what is a natural, normal process. This practice should soon be passed from humanity as it is no longer necessary to keep secret and mysterious any of the glory of a human being. The more open, honest and natural the inner beingness is perceived, the less mysticism there will be surrounding one. This is the goal for new thought.

Mysticism is third dimensional; esotericism is fourth dimensional. Esotericism would be to bring to the light the inner thoughts and feelings. Mysticism is to tend to keep them in the dark.

Your esoteric beingness is the thoughts and concepts you bring in with you to guide your life experience. In some they are closer to the surface than in others. It is the bringing upward and outward of these concepts or guidelines that will open one to the light and allow him to know the true essence of his soul.

As given, mysticism is to not allow this to come fully into the light – to surround it with an air of mystery as being something unusual and therefore very special and holy. This is, indeed, what they are, but need to be brought to the light and lived openly – not kept slightly secret

and hidden from view.

### **The Brotherhood of Man is the True Path**

The true path is that of the brotherhood of man and anyone who holds himself apart from his brothers is not following the true path. He is following a path of separatism, which is in direct conflict with the will of the Creator. The world is ever changing and these concepts of separatism must change also. The best learning process for all is in the teaching of others. What good is it to have a lot of new teachings if you never reach out to help others? If you would teach others who are not as advanced, you would find your own growth rate progressing rapidly. You, yourself, will grow at the exact rate that you extend your hand in offerings of assistance.

This would be spiritual assistance which actually has its roots in the physical while on the earth plane. You can, if asked, advise and counsel the ones you meet, to the extent that you yourself have faced the problem, found your own solution and overcome the incapacity to function that it caused in you. If it is a problem you have not met up with, you would do well to send this person to someone that you know has faced the same conditions and overcome them.

Each must look at his own motives as to why he is pursuing studies in whatever direction of the path he is looking. If the motives are just for your own growth with no desire to serve humanity, fine, pursue whatever you are interested in. If there is a sincere, deep, compelling desire to ease the ache and hurt in humanity, then one must steer the middle path to be a server. One must know about the other paths – that they do exist. One must have a little bit of understanding of these other paths, but must stay true to the path of truth, the middle path. I will try to outline this middle path, to define it and give guidelines for staying on it.

## **The Middle Path**

The middle path may be boring and intellectually dull, but is the most difficult path to tread. You are basically alone while walking it. You will come upon others treading it and meet and mingle awhile, then separate and continue trudging along, veering off neither too far to the right, which would be getting “hung-up” on philosophical platitudes, or too far to the left, which would be getting stuck in psychic phenomena. All usually get caught in one or the other and swing the pendulum back and forth wildly between the two. Eventually, it will settle down and come to a stop, balanced in the center, when the soul decides it’s had enough of this wild trip caused by its personality.

This would be the ultimate goal, the balance of the three bodies, physical, emotional and mental, which will produce the mating of the soul and the personality, your personal reality, and becoming a synthesized human being. This synthesizing can and does take place more often in one who is not “fully developed.” Development of chakras and opening up the third eye etc., has naught to do with the mating between lower and higher, the male and female, the marriage of your two halves into one whole.

The other half is inside you and is an inseparable part of you, but if it is out of touch, you will always feel lonesome, out of kilter, resentful, searching, frustrated, etc., but too much forcing of growth is harmful. Try walking middle ground with a good, intelligent, disciplined, scientific study of the truth. Make a list of facts that are unshakable in your foundation and continue from there to come to your own conclusions through this study of foundational facts.

Progress is much faster if it entails daily meditation for each seeker. Before the meditation period, one should write a list of three subjects or three questions one has confusion about and

would like clarification on. If these are held in the mind while meditating, help will come in some form of understanding, but not instantly. A teacher or guide will perhaps think the best way to clear up an area that is bothering one is by setting up a living situation to plunge that one into and this necessarily takes time to set up. The situation will in some way enlighten the one who is seeking, maybe just by observation or by actual involvement in a situation. For those who do not meditate, these situations may be set up anyway by their teachers in the hope that the one in their charge will “see the light” of some attitude that needs to be changed.

The only way to overcome blockages as far as changing attitudes, is to give the soul full control. Put the personality completely aside and with determination continue what you need to do regardless of what’s coming your way. None has need to concern himself with small minds and mischievous hearts and oversize egos. Much mental discipline is needed to stay on the middle path.

## **Each Branch of the Path is Different**

No one branch or stage of the path is better or worse than another, only different. You set your own rate of progress by the length of time spent in each stage. Some stay much longer in the Christian stage; some move right through to the intelligence stage. It all depends on what was planned, but some do get caught at times on a level that they need to move on from.

The breakthrough to the next level will be made when the next veil is taken away. This is all laid out in one’s chart; so much time is allowed between stripping away one veil before the next one is removed. No one can skip any steps and the progress can only be as fast as the chart is laid out for it to be. This is why some seem like they aren’t growing. They are at a landing on the stairway. It was, perhaps, thought they

needed to have more time with a particular stage of the path. All things work on a rhythmic basis. Remember also, that one cannot lean on another or draw from that other. All must find their own way. They must find their own teacher. The only way they can accomplish spiritual growth is through their own hard work. They must use their mind and they must have the creative release from the inner part of their being.

For this reason, we need to have the arts ingrained in all school subjects, bringing that expression out from the center of each entity from the very beginning. Then we will have a world of people using their higher reasoning, intelligent mind through divine inspiration, which is an integrated circuit in this higher mind. The ideal higher mind is what is meant by the trinity – three lines feeding in and one coming out. The three lines giving input would be the person's own mind, the teachers and guides and the Creator's mind. To bring the last two of these lines into play requires the addition of the arts into the educational process which, at the same time will also aid the other mind, the person's own mind, in coming into play. This trinity is what Jesus did indeed try to describe, but even the most intelligent and well-educated people are still having trouble understanding it.

### **Celebrating Holidays**

#### **Thanksgiving**

People do not think often enough about the need to be thankful for life itself through the Creator. We are the created and we are also the creators. Being thankful does not mean that we must belittle ourselves or humble ourselves to those we are thankful to. Just let them know in some sincere way that you are thankful and appreciate what has been given to you or done for you. In the case of giving thanks to your

Creator, sincerity is very important. The same sincerity is also very important when you are giving thanks to those on the earth plane. They can tell whether the sincerity is present or not because they are part of you, tuned in to the point of their humanness to your point of humanness and if the sincerity is not there they know it. They will feel its absence.

A good exercise, perhaps, for most during the Thanksgiving holiday would be to, ahead of the holiday, make a list of all the items that you have to be thankful for, for the past year and those to whom you are thankful for these gifts and write a sincere, short note to them, not a card that you have purchased as a lot of people do, but a sincere thank you from your heart to all those you are thankful to. It doesn't necessarily have to be for any specific item. If you just sense their love and support behind you then by all means write a short note telling them so. When Thanksgiving Day comes write a short note to your Creator and your teachers and guides, a sincere, short note. This exercise will do far more than anyone could imagine if it were carried out by everyone and Thanksgiving Day itself would be such blessed harmony between the two planes of existence on a vibrational level that the earth herself would respond giving back a loving vibration. When these vibrations start bouncing back and forth from Mother Earth to Father God you will be tuned up with your consciousness being raised. Consciousness denotes being thankful, being aware and feeling gratitude. The feeling of gratitude comes through the conscience, thus the term consciousness.

#### **Christmas**

At the Christmas season many people get depressed, more so now than in years past. This has to do with the commercialism that is continuously growing more prevalent with each passing year. The very people who are

depressed about it subconsciously are the ones who are immersed the deepest in it. Many of those who have stores make much of their yearly living from this time period, yet they feel deep down inside, that it is not the proper way to celebrate the birth of the Christ Consciousness. Yet they are caught up in the society they live in. If they did not go along with the trend, they would soon find themselves out of business.

### **A Monthly Christmas Day**

A monthly Christmas Day would be a way to spread the joy of the Christmas season out to the rest of the year. The holiday of Easter is somewhat the same thing, but not on as big a scale. Perhaps each month should have a mini-Christmas in it, a day of celebration of the "possibility" of each one gaining the Christ Conscience. Life for us on the earth plane would be desolate if this "possibility" were not ever present. This is the true gift from Christ to humanity, after all, presenting to them the possibility of achieving the Christ Conscience. Without this as a goal to aim for humanity would have every right to be depressed, but knowing that this is possible for each and every one should be all the "Christmas present" anyone needs.

The goal of all incarnations; the very goal of all evolution is the gaining of a conscience. The ultimate goal then is the gaining of the Christ Consciousness. Would it not make more sense to have this brought to people's attention twelve times a year, rather than once a year. Also it would spread out the gift giving so that instead of opening up twelve packages on one day, you would have a package a month to open. This would prevent overload or burn-out at Christmas. Schools could plan special programs monthly on a smaller scale. Stores could spread their revenues out more evenly through-

out the year. Above all else, the whole meaning of Christmas would be forever in the minds of people. This could not help but make for a better world.

There is a tendency for the vibratory field of earth to build to a high pitch at this time of year, only to fall to the depths of vibratory rate in the following months. This is not good for the earth as it is not good for the human being. The extreme contrast of vibratory rates is quite hard on the human as on the earth. Isn't it time for humanity to reassess the celebration of Christmas and celebrate it constantly in an even flow, rather than the extreme highs and lows that now take place? This is my wish – that the true Christmas Spirit be with us throughout each and every day of the entire year.

The beings on the higher planes are always on an even keel. They learned eons ago that this was the only way to handle the energy that they possess. They could cause much havoc if they allowed themselves to build to the highs and sink to the lows that we on earth do. Because they are always on an even keel, they are always here to help us and serve as a goal for us to aspire to. .

The true correct celebration of Christmas is an individual celebration. It should be the birth of Christ within the personage, the Christ Consciousness, which I would like to try to clear up. It is actually in progressive stages. The first stage is being Christed which truly is the beginning, the very beginning of taking on the Christ Consciousness. When that happens to one it is a feeling of knowing that you are on the right track, that you have become centered and balanced.

There will be very, very subtle thoughts that creep in about this. If its very blatant and coming right out big and strong, "I have been Christed and I have taken on the Christ

Consciousness and I am now perfect,” you’d better run as quickly as you can from this one, because they’re not anywhere near it. If they even think it, they’re not near it. The ones who are near it are the ones who don’t even realize it. Therefore, they cannot have their own celebration of the birth of Christ in them because they’re unaware of when it happened. Those around them are unaware of when it happened. For this reason there is absolutely nothing wrong with the celebration of Christmas as a symbolic celebration of the birth of the Christ Consciousness that has taken place in a small percentage of humanity.

Therefore, in the celebrations of Christmas, even as far as using the symbolic manger scene, etc. there is nothing wrong with it. The part that is wrong is not realizing the symbology that should be applied to it in an individual sense. This is where the harm comes in, where the wrong is being done, is that they are worshipping, in their mind, that one entity and that to them it is His birthday, a very personal day in the life of the man who is known to you as Jesus. This is so against what He came for. At the same time there is nothing wrong with celebrating the season because the season of Christmas will perhaps be the time when the breakthrough comes for most people. It is the time when most go to the higher levels of their minds.

### Easter

Easter is, of course, being celebrated for the wrong reason, that of Jesus dying for humanity’s sins, which of course He did not do. It should be celebrated only as an example of eternal life, which was the true purpose – eternal life, both in and out of the physical body. It is the culmination of the physical body’s journey. In other words, by this time Jesus had His necessary amount of incarnations and did not

have to return, but chose to take on this mission, as many do choose extra service to further the evolution of humanity.

### The Stage of Pettiness

This is the change over period that so many are in. One part of them is saying, “I know this doesn’t matter, I know this is immaterial, I know its not important but I still know that I want it done my way. This is due to a sensing by all that the inner part of them, the Creator part of them, the creativity, needs to come forward and express and needs to be their own expression. We must have compassion on these ones. We must understand what is going on within them. When more of the self-confidence, the self-esteem, the self-assuredness is brought in through that deep inner part of you, just simply know that this is the real you expressing. When more of this is brought in then each entity will begin to respect this part of the other and have the grace to give them the opportunity to express regardless of whether they think they could have done it better. Each must know and understand and respect that part of the one that is coming through and doing truly that which comes from the center of their being and give that one their own opportunity to grow. It can be done. Its not easy though; it will need to be worked at. Therefore when you see pettiness in another, it could be considered an excellent sign that they are growing because they are entering the change over period, the raising of the consciousness, the changing of the guard – bringing in the Christ Within them. If you do not see this in one and you see a mere acceptance and obeying of orders from others, you are seeing one who is not growing.

### The Stage of Frustration

There is a stage that the child goes through of frustration. He reaches this at approximately two years of age. Thus our term the terrible

twos is what you might consider much of humanity to be in at this time – the terrible twos. It is a stage of frustration that all go through – almost uncontrollable; at times imperceptible. It's partly due to the evolutionary stage humanity is in, partly due to the higher vibrations reaching the earth plane and partly due to a sociological change that is upon our country perhaps more than other countries. This change in society must come about; its time is here. It is a change from our manufacturing age into an Age of Creativity. This change should be called – in relationship to the Agriculture Age, the Manufacturing Age, etc. – the Age of Creativity. This would be creating your own personal reality which then becomes your personality which is the joining of the animal brain part of you, with the divine part of you and expressing the Christ Consciousness.

But, there will be others coming along who must work their way through that terrible period of illusion and of then breaking that illusion and then recuperating and growing stronger, almost as a gangly teenager going through puberty and blossoming into a radiant adult. This is a type of transition that is not as apparent on each small step as it is when the break and crossing over into the main divisions of the brain is made.

The next group, those breaking old religious ideas and sociological rigidity are just beginning the upward flow from the third plane to the fourth. They still have this period of separation and isolation of the fourth plane, harmony through conflict. At this stage, this is mostly inner conflict that, when trying to achieve the goal of externalizing the hierarchy, then comes through to the outer as conflict with others. There are many just taking the step into the fifth level, which is group consciousness.

Remember also that this group just going into

the fifth plane of togetherness will go through another period of separateness, the sixth plane, before the beautiful teachers of seventh plane consciousness will appear. This process cannot be speeded up. This process must be gone through to insure the availability of qualified teachers.

Some are going into the sixth plane stage now, that of separation and will return as the qualified teachers that will be needed within the next few years. This sixth plane lasts longer for some than others, but remember they are planning what they will do when they next get a chance to be with others of like mind.

There is a progression through the twelve mind levels that can be laid out on a detailed “growth chart” almost like the growth measuring charts used for recording physical growth in children.

The stages in schools should also be laid out this way, exactly following this format, almost as a rehearsal for the stages to be gone through, then, as adults. Some will go through the process several times in a single lifetime on an octave higher chromatic scale each time and this will be a lifetime of significant growth. It usually is the twelfth lifetime on the soul's evolutionary growth chart, thereby assuring the progress on that huge chart into the next chromatic key-tone.

### **The Stage Of Intelligence**

The intelligence that is beginning to come forward in all is a stage whose time is due. The beautiful vibrations that are just beginning to find a way up through the fog and miasma that hangs very close now on the earth plane.

It needs to be realized that each must test his own center of being. An individual cannot have this forced on him or he is being denied the right to self-discovery and self-instruction from the fountain of knowledge that is in each one.

When this fountain opens up, the universe has just been created. Everything said about the creation of the universe is to be used in direct application to the creation of the universe inside each individual, the New Creation that we have been discussing.

If these New Millennium NoteBooks on birth and development were rewritten as being in direct application to individuals instead of the large creation, you will have one of the most powerful sources of self-study for individual universities that will be available to humanity. These teachings are giving humanity a road map to the “New Creation.” It is to be, remember, an individual search and only those who are ready, through self-analysis and self-testing will inhabit the “New Creation” which is, after all, only the unfolding of the Holy Spirit in each.

When the beginning seeker has been able to accept the fact of reincarnation as the basis for his spiritual beliefs, then he is ready for more detailed teachings.

The fact of reincarnation will be proven scientifically soon. Reincarnation is the only way home to the Creator. No one can progress on to eternal life without being born again in the true sense of that phrase. To be born again means literally that. To be born into human flesh over and over and over, until perfected enough to be able to progress on into life on the inner planets on the ethereal level of physical manifestation. This stage cannot be entered into without the rebirth process of perfecting the soul that takes place on the physical plane.

When the entity known as Jesus entered, He had been perfected as far as a third degree initiate. Many today are advanced higher. Any of these could accomplish what He did if their motivation was as His was, pure unadulterated love for all humanity.

The pattern of time is laid out as though viewing a picture hanging on a wall. This pattern can be seen by psychics, but unlike a map with an X marked on it saying “You are here,” this picture does not do that. When one sees this flat picture, he has no way of knowing what spot he is at, so therefore cannot tell if something he sees has already happened or is going to happen. Visualize this flat picture as constantly moving with both edges of it concealed. It is moving very slowly. The picture of the Piscean Age is all there at one time and if we could mark an X at the spot where we are now, the X would be to the far right. The picture is moving to the left. Just a faint hint of the Aquarian Age can be detected entering at the right of the picture. Consequently, not much is known of what the New Creation will be like. It is not known by any as it has not developed to the point of being able to be seen, like a negative of a picture that has not been developed. Therefore, because it is not developed, it can be changed and worked with and planned until it is as perfect as can be. But at the same time it can also be blemished if touched by uncaring hands. It needs to be protected like an unborn babe.

This picture of the New Creation is being formed and painted and planned by all humanity. The wishes for a better life in the thoughts of many are drawing a tree here, a stream there, etc., on this painting. The more awakening and educating of humanity that can take place, the more beautiful this picture will be, but the picture will be drawn regardless. It must be, this is evolution.

Everyone reading this must realize that they are drawing a share of this picture, a larger share than most, because they have been awakened and alerted. They are now being educated to take their place and fulfill their responsibility towards getting as beautiful a picture as possible to develop – a positive print out of a nega-

tive. They need to form ideals and concepts to encompass all aspects of daily life, but they are not to be far-out philosophical ideas, but rather “down to earth,” solid ideas for a better way of life for all humanity.

Each one has by now some indication of the path that lies ahead of him. It is not an easy path. That easy path has been tried for the last 2000 years and must be considered a failure. The life of a true disciple of the Christ will not be easy.

As you know, an oil painting needs to be worked on all over the canvas and the total picture brought out in all areas. One section, such as a tree, cannot be finished if the sky behind it is not. It is an enormous plan and will take the efforts and cooperation of everyone to bring it about.

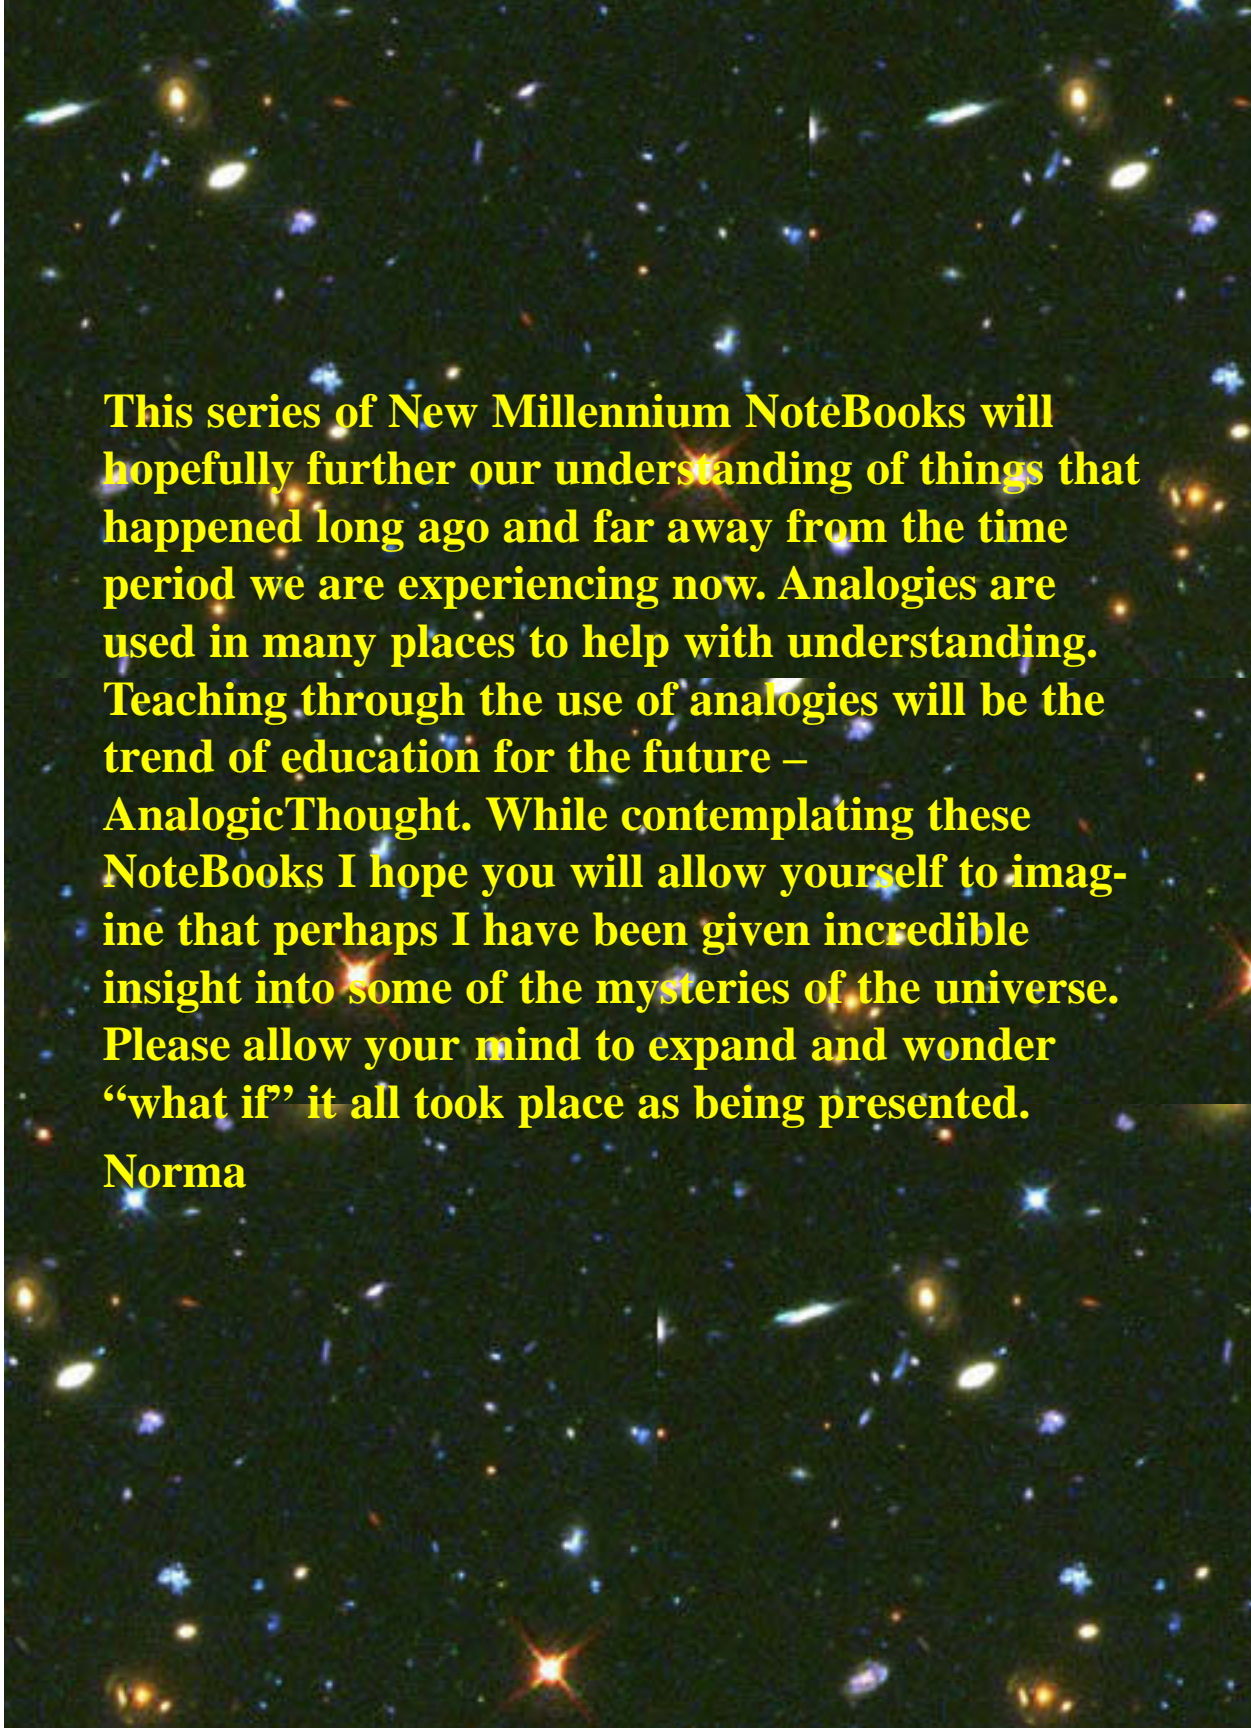

The Creator knows what He would like the finished picture of the Aquarian Age to look like. He'll probably have to make concessions here and adjustments there, but He will never give

up trying for the best, the ultimately perfect world for His people.

The only way the Creator can have any influence on the new picture being drawn is to filter His thoughts to humanity so they in turn can do the actual drawing and painting of this picture. The more awakened, the more influence He can have on making the New Creation a better one for all.

The New Creation is to be the Age of Creativity, as the inner journey must come forward through the physical body's expression. The only way this expression of the soul can take place is through the arts. This must be started in wee babes and carried through each lifetime. Each must learn to express his inner self and feelings in an outward way. Thus the age of Creativity. In the New Creation, the Truth of a person's inner beauty and beingness will be what determines his means of earning a livelihood. It will be as simple as that. There is only one true path; the God Within.

**This series of New Millennium NoteBooks will hopefully further our understanding of things that happened long ago and far away from the time period we are experiencing now. Analogies are used in many places to help with understanding. Teaching through the use of analogies will be the trend of education for the future –**

**AnalogicThought. While contemplating these NoteBooks I hope you will allow yourself to imagine that perhaps I have been given incredible insight into some of the mysteries of the universe. Please allow your mind to expand and wonder “what if” it all took place as being presented.**

**Norma**
