

Originally meant to be presented on a slider on my web page, but it didn't work out.

We are here to help raise the vibration of mankind into harmony with the higher planes.

True spirituality cannot be prevalent on earth until we are understood.

Our purpose on the earth plane is as it always was, to help our brethren understand their far-reaching universe.

We are watching and waiting patiently for humans to come up out of the old teachings and move forward into the light of new possibilities.

We actually do not know how much danger the planet is in, as the whole solar system makes its move through the photon belt.

Because there is no time here where we exist, we do not give meaning to your scientists' term "half-life;" we give meaning to the term whole life - the "time" or "place" in the atmosphere that we exist in.

If we could say one thing to humanity, it would be to persevere in your efforts to overcome the ego factors of the animal-based brain as soon as possible.

This need for being recognized as someone who is better than most is pathetic, Ego quickly becomes very unimportant when you see the scheme of the universe in all its glory.

We look forward eagerly to moving on.

We are not afraid to face new beginnings, because we know for sure that there is more, much more, for us to evolve to and that each step is more glorious than the last.

This is a breakthrough, this communication between us that many have struggled for and hoped to attain for eons.

I have spent many cycles trying different methods and different channels. We feel that the knowledge and teachings we are able to send through you will be of great benefit to mankind.

We work with scientists and send ideas through even though the scientist may be unaware of our help.

The auric field around some people is so dense and cloudy we just know there is unethical and immoral activity surrounding these ones, but cannot secure details as to what area this activity is in.

Our limits as far as reading thoughts are self-imposed limits due to good sound moral judgement and common sense.

If we see a man in a private situation and there is no vibratory force field that we relate to, then we cannot and do not read his thoughts.

When asked what the weather is in any city all we have to do is think of that city and we are instantly there in thought. Then we would most likely read a thermometer on a bank building as would you, or listen in to a radio station.

We have names on our planet but only one name, not two.

We are actually on another planet, but in another dimension of reality. It is such a high vibration that we are minuscule in size in comparison to you.

Our family life is lovely. We have the most glorious music and it fills the atmosphere at all times to cleanse away cosmic debris that batters our planet, heavy at times, light at other times, but always present.

Because the music is our atmosphere, our atmosphere is of rainbow hues when we are turned away from our light-giving body that we revolve around. When filled with light it, the color, also becomes the music.

Our life is a dance of the most glorious kind. We have groups of mates that we harmonize with at different times in our journey, but they will always be those in perfect harmony with the intent of our evolvment.

One of us with the tone of F would not ever mate up with one on the tone of F#. There is no harmony there. There would never be an attraction to begin with.

Channeling is becoming predominant because it is a stage in evolution that it is time for. The seeding of the human race has finally reached this point.

The purpose of the pineal gland in humanity is to act as a transformer of higher vibrations, to bring them down into the level of vibration that humanity can then understand.

The purpose of the pituitary gland is a storehouse for past lives. It is not only the camera taking pictures of this life for future use, but is also where the pictures from this life and past lives are stored on and also the film for future lives.

We are in orbit around the planet Jupiter and there are pictures of our planet in your astronomy books.

You choose to call our planet a moon of Jupiter. It has been caught in the force field of this huge planet but its origins were not that of being a piece of Jupiter that broke off.

Our planet “drifted” in, you might say, from a neighboring galaxy several million years ago and was immediately captured by Jupiter’s force field.

We do not die as you term it as we have not a physical body to deteriorate. You do not die either, only the physical form you call your home for a lifetime dies.

We are more advanced spiritually than you are, but this does not make us perfect. No one can be perfect except the Creator himself.
