

What if

On my 93rd birthday I'd like to share with you all the material that has come through me since opening up to my inner being.

Windows on the Past

Understanding Where We Came From

What If

I was able to:

1. experience the "big bang" from the inside
2. compare subatomic particles to snowflakes
3. experience being part of forming the ice lattice
4. experience being the first person on earth
5. understand how the planets and stars formed
6. compare the universe to a whipped cream salad
7. experience spinning inside a galaxy
8. experience the forming of our solar system from the inside
9. know the very beginnings of the mind of humanity
10. compare planet earth's formation to a tapestry
11. experience being from another galaxy and instigating the experiments on animals
12. experience the formation of the chakras in humans
13. crawl inside a brain and see how it formed
14. pretend to be the Creator God and send down humans to experience
15. understand the path of progress for souls

Journeys in the Present

Understanding Where We Are Now

I was able to:

16. know of all the help available to humans on their journey
17. understand why our attitudes are very important
18. know how karma really works
19. know how and why I chose my present life's conditions
20. understand how my body responds to circumstances
21. see the whole path of progress laid out in a drawing
22. understand the lower six inner planes
23. have a glimpse of the higher six inner planes
24. get a good picture of how reincarnation works
25. know of all the help available to me on my journey
226. understand how channeling works
27. experience lower plane channeling
28. have a look at how higher plane channeling works
29. understand the philosophy needed for moving forward in evolution
30. experience new ways of restructuring our society

Pathways to the Future

Understanding Where We Are Headed

I was able to:

31. get a glimpse of the coming new technology through the Science of Music
32. see the kingdoms laid out as Vibratory Charts
33. see the formation of rocks from the inside
34. know how the plant kingdom grew and expanded
35. feel the changing conditions of the atmosphere as it evolved
36. see new ways for agriculture

37. see new ways for education
38. see new ways for chemistry
39. see new ways for biology
40. see new ways for healing
41. see new ways for architecture
42. see new ways for astronomy
43. understand the evolution of light
44. learn of SunScience
45. get a glimpse of our future
